MAYSVILLE, N.C. (AP) — A broken main means a North Carolina town is completely without water.

News sources report all restaurants were closed and other businesses were impacted in the town of Maysville on Thursday. Maysville is 117 miles (188 kilometers) southeast of Raleigh, and has a population of 959 as of 2017.

The break occurred in a water main at the intersection of Main Street and N.C. Highway 58 that supports most of the town's water system.

Town Manager Schumata Brown told WITN that workers couldn't isolate the problem and had shut down the entire town.

Residents are being told to boil any water collected before the system was shut down, and to continue boiling it once service is restored until tests confirm it's safe to drink.

BOIL WATER ADVISORY MAYSVILLE

- Maysville issues boil water advisory until further notice
- Boil water for one minute before use
- Alternative is to use bottled water

Maysville looking into ways to fix issue with chemical in water system

by Greg Payne and Jason O. Boyd | Fri, June 14th 2019, 3:28 AM EDT

Maysville officials met Thursday to discuss the current water situation after a chemical was found in their system earlier this week. (Greg Payne, NewsChannel 12 photo)

MAYSVILLE, Jones County — A meeting Thursday by Maysville officials addressed the concerns that were raised after a man-made chemical was found in their drinking water.

financial position and operations. We request that you respond to this letter, addressing each concern we have raised.

On a positive note, we commend the Town for its increase in fund balance in the General Fund. The Town added over \$32,000 to fund balance available for the 2013 fiscal year, an increase of over 21%.

We noted various signs of financial weakness in the Water and Sewer Fund indicating that the water and sewer system may not be financially sustainable in its current form if circumstances do not change. The Fund reported a net loss on both the full accrual and budgetary basis of reporting (pages 19 and 42 in your audited financial statements, respectively). These losses indicate that revenues are not sufficient to cover the costs of providing water and sewer services. Cash flow from operations (see page 20 of the audit), was negative, which means the Town did not receive enough cash to cover the cash outflows, including debt service, necessary to provide water and sewer services. The Board must evaluate the performance of this Fund and make the changes necessary to improve financial operations and sustainability. We have noted that the Town has raised rates for the 2013-2014 fiscal year. The Board should carefully monitor the results of this rate increase to determine if it is generating the expected amounts of revenue. Rates, rate structures and collection procedures should provide coverage for at least system operating costs and debt service payments. In fact, if the Town is to be eligible for State grant or loan funding for water system expansion or growth, the rate structure must meet certain criteria, one of which is that it provides sufficient revenues to meet or exceed operating expenditures plus debt service costs.

We also noted that the budget to actual financial schedule for the Water and Sewer Fund...
